

# Free 60-Day Trial

## ***What is Lurking on Your Networks? Don't Wait to Find Out!***

Hackers are constantly knocking on all utility networks, searching for weaknesses to exploit and financial data to steal. Setting strong passwords, installing anti-virus/malware software, and configuring firewalls are no longer enough to protect your utility data communications networks from cyberattacks. Plus, you may not have the resources to monitor and secure your networks full time. That's where N-Dimension comes in. And we can prove it to you.

N-Dimension is once again offering a **60-day Free Trial** of N-Sentinel Cybersecurity Monitoring Program.

N-Sentinel Monitoring by N-Dimension provides:

- Easy, fast deployment and hands-off management of sensors
- 24/7 remote monitoring and detection of network issues
- Customizable Email Alerts
- Cloud-based threat analysis and information on threat activity
- Grouping of several cybersecurity alerts into meaningful and easily understandable cybersecurity concerns with suggested recommendations
- Web-portal access to your reports & threat activity being found across utilities in the communities
- Access to cybersecurity experts to answer questions and provide guidance

With its simple, behind-the-scenes approach to the cybersecurity monitoring, the N-Sentinel Cybersecurity Monitoring sensor unit can be deployed in various networks, whether in your IT and/or OT networks.

To arrange the 60-day free trial, please contact our Sales Department at [sales@n-dimension.com](mailto:sales@n-dimension.com) or **770-355-1802**.
